**DETAILED ACTION**

***Allowable Subject Matter***

Claims 2-18 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 2, 4 and 13, the prior art of record does not teach nor suggest, in the claimed combination, a vibration absorber for absorbing vibrations over a range of frequencies from a vibrating device comprising: at least an element connected between the base mass and the absorber mass; a magnetic flux path through the base mass, the absorber mass and the element for conducting a magnetic field, the magnetic flux being changeable in response to a change in frequency from by vibrating device; the element being switchable in response to a change of the magnetic flux in the magnetic flux path whereby vibrations over the range of frequencies may be absorbed by the switchability of the element.

Claims 14 and 16, the prior art of record does not teach nor suggest, in the claimed combination, a method to absorb vibrations of a specific frequency from a vibrating device comprising; applying a magnetic field to a vibration absorber and causing the vibration absorber to proportionally in stiffness change in response to inducement of the magnetic flux so that the vibration absorber absorbs the vibrations of the specific frequency from a vibrating device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2832

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
